(2) Download

Download and install TeXLive

<https://www.tug.org/texlive/>

- **Concise instructions, per platform:**
 - [install on Unix/GNU/Linux](#)
 - [install on Windows](#)
 - [install on MacOS: MacTeX distribution](#)

The MacTeX-2025 Distribution

MacTeX-2025 requires macOS 10.14, Mojave, or higher and runs natively on Intel and Arm processors. To download, click [MacTeX Download](#).

~~The smaller BasicTeX-2025 also requires macOS 10.14, Mojave, or higher and runs natively on Intel and Arm processors.~~

TeX Live on Windows

...

Easy install

When installing from the internet, we recommend downloading and running [install-tl-windows.exe](#).

This installer first unpacks itself and then starts the installer proper, which is the same as for other platforms.

Anaconda Distribution (3) Install

Complete package with 8,000+ libraries, Jupyter, JupyterLab, and Spyder IDE. Everything you need for data science.

64-Bit (Apple silicon) Graphical Installer

↓ 64-Bit (Apple silicon) Command Line Installer

(or the equivalent windows version)

Launching Introduction notebook using Anaconda Python
